To whom it may concern,
XM radio is the greatest thing to happen to radio for a truck driver. Getting up to date traffic and weather before reaching your destination is essential to getting a load in on time. Being able to plan ahead for a delivery keeps me running smoothly and truck drivers being a large part of the back bone of America, running smoothly and on time is improtant. XM keeps this possible with their traffic and weather updates for the truck drivers of America.

Thank you,

Gregory S. Seal
